

C.T.C

SERVICIOS AMBIENTALES

ABOUT US

HISTORY

C.T.C Servicios Ambientales started in 1994 with the idea of managing, in a comprehensive way, the waste classified as urban waste such as paper, cardboard, plastics, scrap metal, wood, wreckage, pruning, mud, organic, hazardous waste, etc., of end users and suppliers.

Later, we added new logistic services as commercialisation of pallets, special transportation and road haulage with national coverage.

To cover this demand, *C.T.C* has always relied on a highly qualified professional team, advanced technical means and great polyvalence, being able to provide quality and competitive solutions.

BUSINESS DEVELOPMENT

Our business activity was developed in Andalucía and during the last years we have expanded to the rest of Spain. *C.T.C* has more than 50 modern trucks, more than 2.500 equipment, as well as special vehicles for hazardous waste transportation, everything made to meet our growing demand. We have the necessary authorisation for national and international road transport and we are waste managers in 100% of the national territory.

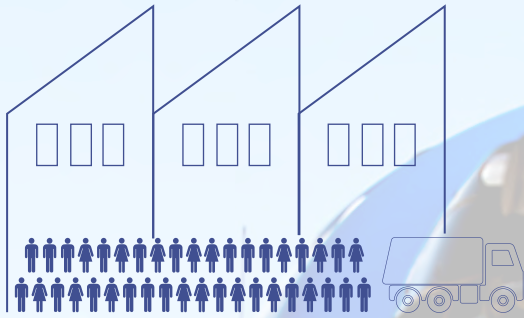

STAFF AND FLEET OF VEHICLES

"OUR GOAL IS ZERO WASTE"

We have an environmental complex, recently installed in San Fernando de Henares (Madrid), which has 70,000 m2 where are managed, stored temporarily and classified non-hazardous waste for recovery or recycling.

Through automatic and manual selection processes, we separate the recoverable fragments from the waste mix, trying to achieve a good waste management to reduce environmental effects and achieve our goal of zero waste.

Our *C.T.C* staff is made up of more than 50 professionals specialized in logistics, quality control and environmental management. We pay special attention to our staff to make sure their functions are developed under the security and occupational health regulations.

We have a newly-renovated wide fleet, made up of vehicles with different features and dimensions like container ships, tow trucks, scrap grabbers, freight trucks, three axle trucks, non-articulated truck, bin trucks, mobile decks, pickup base trucks, tautliner, etc.

To complement this fleet, we also have technical assistance vehicles for all of our equipments, and adding to that, we have more than 2.500 equipment units for waste management, mainly trash bins, trash compactors and auto compactors with 7 m³ to 33 m³ load capacity.

• **TRASH COMPACTORS AND AUTO COMPACTORS**

We own more than 2.500 uts between auto compactors, compactors and containers for waste collection.

• **CONTAINER TRUCKS**

The majority of vehicles have ADR certification for hazardous cargo transportation.

• **RENOVATED VEHICLES**

More than 50 newly renovated vehicles, mainly hook trucks, tow trucks, scrap grabber, freight trucks and container ships.
We have our own technical service vehicle.

SERVICES

C.T.C Servicios Ambientales has the capacity to offer Comprehensive Management of the transported waste, thanks to the collaboration with different sector partnerships, authorized for the waste final valuation and management.

Thus, we trust related companies which create synergy and new business opportunities. Our related companies are as follows:

WASTE VALUATION

- Reciclados La Red, S.L.
- Reciclados Plásticos Serva, S.A.
- Ecoplastic Ambiental, S.L.
- Banales I, S.L.
- Ecogestión de Residuos Europa Sur, S.L
- Banales III, S.L.

HAZARDOUS WASTE MANAGEMENT

- BEFESA Gestión de Residuos Industriales, S.L.
- SERTEGO, S.L.U.
- Ambar Eco, S.L.

Our facilities are strategically located in Seville, Cordoba and Madrid, and they make more than 150.000 m2. In addition we are pioneers in the implementation of new technology in Spain and a model in production volume and environmental respect.

Waste comprehensive management

C.T.C is dedicated to comprehensive waste management assimilable to urban and organic, hazardous and non-hazardous waste , industrial waste sludge and are authorized to transport waste Sandach. For they have the best technical resources and humans.

We offer solutions with high added value such as document destruction of confidential information on any medium (paper, digital files , textiles, etc.) and the destruction of obsolete and among other environmental services products also generate RDF , refuse derived fuel as a how to recover non-hazardous waste and achieve our goal of zero discharge.

In addition, we have a sorting facility for industrial waste , where through processes of automatic and manual selection recoverable separate fragments mixed waste for recycling.

Our technicians , graduates in environmental science, environmental support will give you need. Our purpose is to provide as complete a service as possible for our customers to worry only to carry out their activity.

We offer optimized comprehensive service of transporting waste management and ensuring full traceability is avoided, in addition to meeting strictly quality standards, safety and requirements environmental. We manage:

Organic waste Biodegradable waste from parks, gardens, food waste from kitchens, restaurants, food processing plants, and generally all the agri-food industry.

Non-hazardous waste Waste generated by any person or company, being reusable (paper and cardboard, wood, plastic, scrap metal, etc.) or non-reusable, last ones put in dumping site or in energy recovery plants to achieve the objective of residue "0" through use as RDF (Refuse Derived Fuel).

Hazardous waste This meaning the dangerous or toxic waste. The entities that produce them have to carry out a strict legal and environmental control of them and its final destination.

Industrial waste Waste as a result of production process, transformation or usage in industrial activities. Its typology includes hazardous and non-hazardous waste, and must be appropriately identified

Mud waste Waste made up of a mix of water and residues that must be appropriately separated using different procedures. There are many different types of mud, including hazardous and non-hazardous.

ABPs waste This is animal waste that are not intended for human consumption. These wastes are regulated to ensure that during transport management and no risk to human health , animal health or the environment are generated.

EQUIPMENT RENTAL

C.T.C has a broad variety of equipments such as open and closed trash bins, trash compactors and auto compactors. All in all, more than 2500 equipment with load capacity of 7m³ to 33 m³, that is distributed according to its dimensions.

The equipment of our company is essential in the collection process, in which the materials are classified previously and then collected to be left in our trash bins and trash compactors. As for hazardous waste, we ensure pick up by qualified workers within 6 months.

ROAD HAULAGE

It is one of the most important procedures in daily company's activity and closely linked with the comprehensive waste management.

It is transported in specially adapted vehicles for trash bin transportation, with suitable and ideal box designs for different types of waste.

In addition, *C.T.C* has a wide fleet of freight trucks, three axle trucks, bins, mobile decks, pickup base trucks, tautliner, etc. *C.T.C* has the necessary permits for the provision of transportation services.

As for hazardous waste, it is set up in specially authorised vehicles under the ADR regulations (hazardous goods transportation), identified with danger signs for transported waste and we keep the isolation conditions required by law. The most common road haulages are the next:

- Vehicle with container ship service
- Special tow trucks
- Package and goods in pallets
- Waste classified as urban waste collection 24 hours a day, 365 days a year
- Farming plastics collection

OTHER ENVIRONMENTAL SERVICES

C.T.C provides special transport service and we trade returned materials.

Furthermore, we carry out the destruction of obsolete products and confidential documents in different kinds of formats and supports. Besides we collect farming plastic waste.

In addition to that we also devise comprehensive waste solutions in Clean-waste and/or Environmental Eco Parks, in business parks, distribution companies and industries. Below we present you some of our additional services:

- Comprehensive management in Clean-Waste and/or Eco Parks
- Pruning collection in residential areas, parks, gardens, etc
- Selective collection in public streets , shopping centers, industrial parks and ultimately in the private sector
- Advise on proper waste management and current legislation
- We support environmental thanks to our technicians, graduates in Environmental Sciences and free charge
- Generate RDF, refuse derived fuel as a way to recover non-hazardous waste and achieve our goal of zero discharge
- Equipment rental (trash bins, compactors, press, etc) for waste collection in its production centre
- Used pallets trade
- Unusable products destruction
- We have a sorting plant of industrial waste, which processes through automated and manual selection recoverable fragments separate the waste mixture for later sale
- Collection services of any kind of waste, for which we are appropriately authorised

SOCIAL CORPORATIVE RESPONSABILITY

In *C.T.C* we are responsible with our own environmental, social and economic assessment. For this reason we promote recycling and reduce use of resources (energy, water, raw materials, etc.) in our facilities and in our clients and suppliers facilities, so that between all we can reduce the environmental impact of our activity.

besides, we keep our commitment to our staff and clients based on equal work opportunities, fair contracts, relatively flexible working hours to find the balance between work and home life and promote direct and open dialogue. In Addition, we fulfill the LBSMB Law is the Law of Social Integration of the Disabled and we are aware of handicapped people's rights and Their social and work inclusion.

We have a new fleet management system called "fleet Manager" that calculates key parameters to optimize vehicle performance and efficiency and also driver behaviour.

This system allows us to establish preventive and correcting measures in vehicles and continuously train drivers, in order that they quickly understand and take in the concepts about efficient driving and the improvement of the entityhs profitability.

Listed below are some of our implemented measures to add value to our Social Corporative Responsibility strategy

- Reduction of gas consumption between 5% to 15%
- Reduction in accidents and insurance claims expenses
- Save fleet maintenance costs
- Increase in drivers and goods security
- Encourage efficient driving (responsible), fine reduction
- Continuous training for drivers
- Incorporation of a Workplace Risks Prevention Plan
- Reduction of CO₂ emissions and other pollutants up to a 15%
- Application of the regulations and current legislation

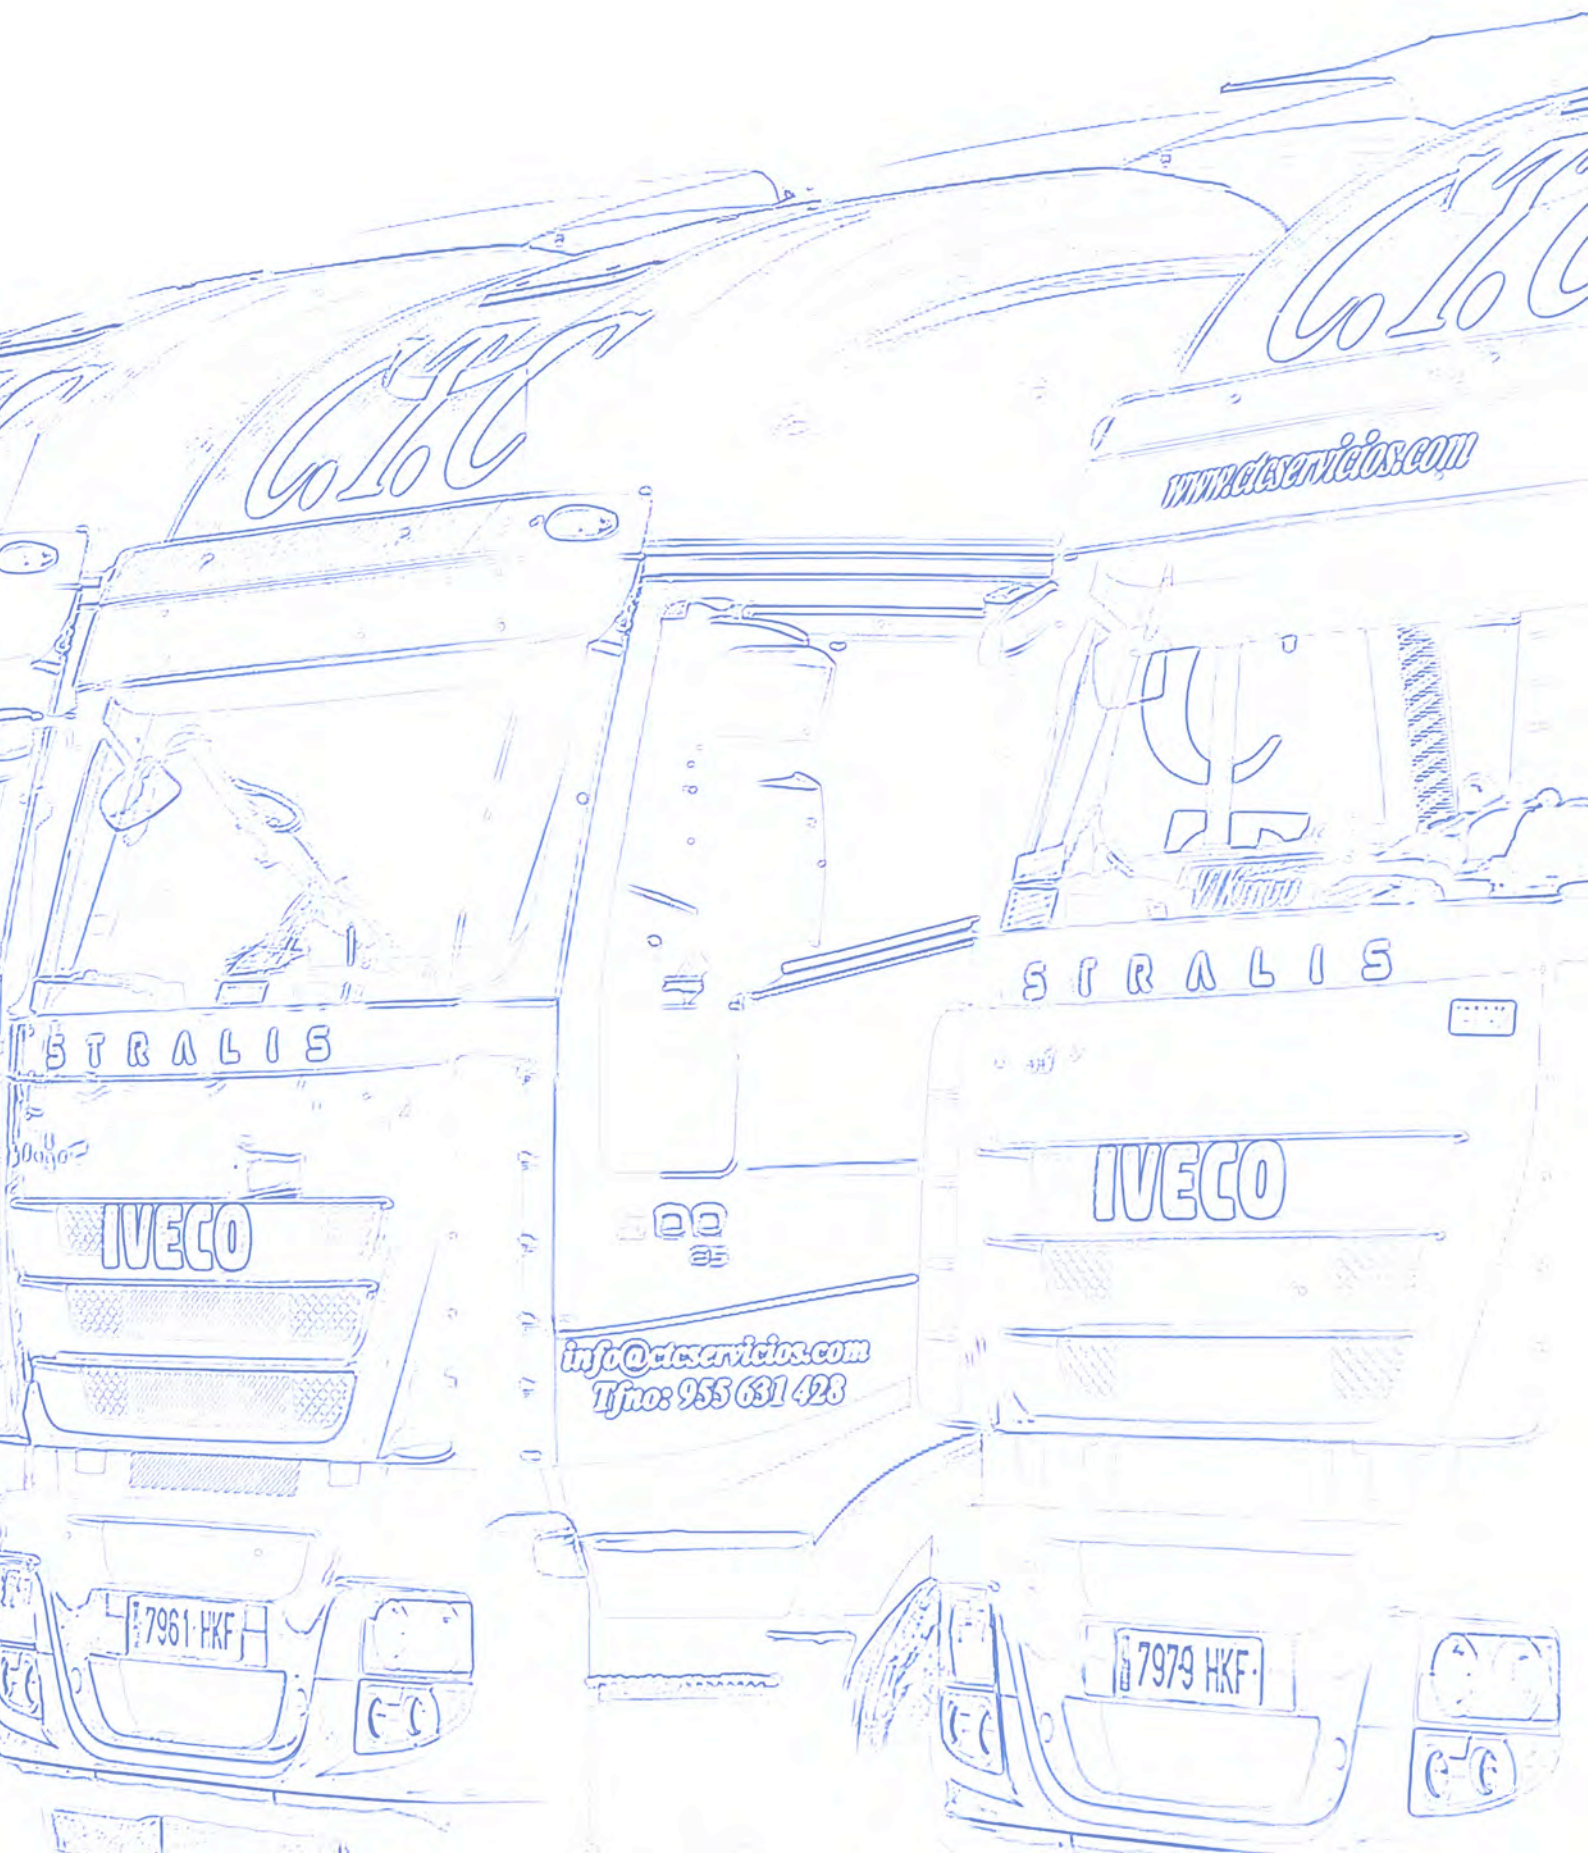

The faithful following and respect for existing legal regulation in Spain and the European Union is one of the keys to our success, which made us get the ISO certifications in both Quality Management, Environmental Management, and Security Management and Occupational Health, and approved by the Integrated Management System ECOEMBES.

- Quality Management System UNE EN ISO 9001:2008, certified with number ER-1563/2007
- Environmental Management System UNE EN ISO 14001:2004, certified with number GA-2007/0547
- Occupational Health and Safety Management System OSHAS 18001:2007, certified with number SST-0150/2007
- Certified IQNET Management System
- Integrated Management System ECOEMBES
